SODIUM-ION BATTERIES

Sodium-ion batteries are the eco-friendly, safe alternative to lithium and lead. Powerful, reliable, and perfectly suited for modern storage and energy applications.

Conflict-free & sustainable

Maximum safety

Easy to recycle

Ideal for retrofitting

MORE PERFORMANCE LESS RISK

Sodium-Ion batteries are the superior alternative to lead, lithium, and $LiFePO_4$ batteries. The comparison is in favor of sodium.

8 REASONS FOR SODIUM IONS

- Significantly longer service life, 10 years +
- No lead, no rare earth elements
- High charging speed & very high discharge current
- Temperature tolerance from -40°C to +60°C
- Can be used in existing systems
- Safe during storage & transport, even at 0V
- 1/3 the weight of lead-acid batteries
- No fire hazard
